SUMMARY

Frontend Developer with First Class MSci Computer Science background and experience building responsive, accessible web applications and production websites. Strong foundation in modern frontend development, Agile practices, reusable components, testing and performance, with experience delivering solutions for people of various backgrounds. Skilled at translating requirements and feedback into reliable, user-focused digital experiences.

SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React, Vue.js, HTML5, CSS3, Node.js (Express)
- **Frontend Engineering:** Responsive Design, Reusable Components, REST API Integration, Accessibility (WCAG), Performance Optimisation
- **CMS & Web:** WordPress, Squarespace, Elementor, Custom WordPress Development, SEO, Google Analytics
- **Engineering Practices and Design tools:** Agile/Scrum, Git, GitHub Actions, Test-Driven Development (Jest), Software Testing, CI/CD Basics, Code Reviews, Figma, Canva.

EXPERIENCE

Web Developer - Independent Projects (SEP 2024 - PRESENT)

- Delivered five responsive production websites from requirements gathering through to launch using WordPress and Squarespace.
- Built accessible, mobile-first websites focused on usability, performance, SEO, and cross-device compatibility.
- Implemented CMS customisation, analytics, optimisation, caching and practical maintenance solutions to improve performance and maintainability.
- Collaborated with stakeholders to refine requirements, incorporate feedback, and deliver user-focused solutions aligned with business needs.

Software Engineer - SPortal, University Team Project (SEP 2022 - MAR 2023)

- Developed five SharePoint web parts using SPFx, React and TypeScript, translating stakeholder requirements into usable functionality within an Agile team.
- Implemented Jest-based TDD and integration testing, reducing identified bugs by 60%+ and improving confidence in delivered features.
- Collaborated through sprint planning, peer reviews and stakeholder demonstrations, communicating technical decisions and incorporating feedback into development.

INTERSHIPS

Frontend Developer - RHUL Module Choice System (JUL 2021 - AUG 2021)

- Developed Vue.js frontend features for a module selection platform supporting over 12,000 users.
- Collaborated with backend developers to integrate frontend functionality with Node.js services and database systems.
- Used Git and Agile workflows to contribute to feature development, testing, debugging, and project delivery.

EDUCATION

Royal Holloway University of London (SEP 2019 - JUN 2023)

- First Class Honours (1:1) in MSci Computer Science with Software Engineering.

Woking College (SEP 2017 - JUN 2019)

- ABB in Maths, Computing and Physics respectively.
